

## **2. Project Characteristics**

---

*d. Anticipated Adverse Social, Economic and Environmental Impacts*

**PROJECT CHARACTERISTICS****d. Anticipated Adverse Social, Economic and Environmental Impacts**

At this time the Higgins Development Team has not identified any anticipated adverse social, economic or environmental impacts for this project. We have received soil boring data taken from areas adjacent to the primary site located at the intersection of Hornbaker and Thomason Barn Road at Innovation Park, however, until the Division of Forensic Science finalizes the site selection process we are unable to determine any additional environmental or archaeological impacts.
