

Virginia Department of Forensic Science
Forensic Science Academy
Annual Retraining Seminar
Virginia Beach, Virginia
September 2 – 4, 2020

This program is designed to keep Virginia Forensic Science Academy graduates abreast of changes in the expanding field of forensic science. In addition to providing updates concerning laboratory topics, case studies addressing situations encountered at actual crime scenes will be presented as well as a legal update. There will be a Manufacturer/Retailer Exhibit sponsored by the Alumni Association that will allow attendees to see some of the newest developments in crime scene search equipment.

Graduates interested in sharing their knowledge of new methods, techniques or resources they have found particularly useful or any experience and knowledge gained by a particular case, please contact Jeff Dwyer at 804-588-4144. Suggestions for presenters from outside of our group are also welcome.

The seminar will be held at Wyndham Virginia Beach Oceanfront, 5700 Atlantic Avenue, Virginia Beach, VA 23451.
